Ar mhaithe lenár lorg carbóin a laghdú, ní úsáidfear aon ghineadóir ar shráideanna Bhaile Átha Cliath chun cumhacht a soláthar do theilgeoirí. Ina ionad sin, úsáidfear cumhacht an phríomhlíonra agus an teicneolaíocht léasair agus LED is déanaí go mbeidh riachtanaisí cumhachta ísle ag ár dteilgean. Soláthrófar cumhacht don teilgean agus do na suiteálacha uilig i bPáirc Chearnóg Mhuirfean trí phlandola a ndéanadh hidreachóireáil air agus taisc-chadhnra logánta a luchtóir le linn na n-uaireanta seachbhuaice.

To reduce our carbon footprint no generators will be used on the streets of Dublin to power projectors. Instead mains power will be used and using the latest laser and LED technology our projections will have low power requirements. All the projections and installations in Merrion Square Park will be powered using hydrotreated vegetable oil and localised battery storage which will charge during off peak hours.
